

## Gdynia Maritime University – Executive MBA for the Offshore Wind Energy sector

29 March 2022 /

**The first Executive MBA program in Poland for the Offshore Wind Energy sector starts at the Gdynia Maritime University**

MBA programs created by the Maritime University of Gdynia are intended for candidates with practice in companies from the maritime industry and the offshore energy sector. The program is implemented in cooperation with the University of Applied Sciences Bremerhaven and Business Academy SouthWest. These are leaders in managerial and specialist training for the offshore wind energy sector in Europe.

Participants of the Executive Offshore Wind MBA studies will acquire advanced competences and modern management knowledge in offshore energy companies. Graduates of the program will gain unique skills sought after on the Polish and global offshore market and international qualifications confirmed by the prestigious Executive Offshore Wind MBA diploma. Graduates will receive an MBA Postgraduate Diploma issued by Gdynia Maritime University and an international Executive Master of Business Administration diploma issued by Gdynia Maritime University, signed by the University of Applied Sciences Bremerhaven and Business Academy SouthWest.

The program is under the honorary patronage of the British Embassy in Warsaw and the Danish Embassy. The study partners are Polish and international companies from the offshore wind sector.
